

IBUS MULTIMODALITY BREAST IMAGING AND IMAGE-GUIDED INTERVENTIONS COURSE

Detection, Diagnosis, Management

Recommended by

8 -10 June 2017

Eugenides Foundation
Athens, Greece

Welcome to the IBUS 2017 Course !

The **IBUS Multimodality Breast Imaging Course** is an intensive three-day teaching programme with theoretical and practical topics covering all forms of breast imaging.

The international and local faculty consists of imaging and breast disease experts selected to demonstrate the optimum utilization of imaging modalities for the detection and diagnosis of malignant and benign conditions using high resolution ultrasound, X-ray mammography and magnetic resonance imaging.

The course is suitable for clinicians and allied health professionals with basic and advanced knowledge, and consists of **lectures**, **interactive case studies** and **practical “hands-on” workshop sessions**.

The practical sessions will focus on high resolution ultrasonic scanning techniques and interventional procedures.
