

Professor Rainer Otto was Head of the Department of Medical Services, and the Institute of Radiology at the Cantonal Hospital in Baden, Switzerland. He made many contributions in developing interventional techniques, particularly in the use of ultrasonic guidance for fine-needle cytological and histological evaluations of breast lesions.

With more than 350 publications, Dr. Otto contributed to the knowledge in the application of imaging modalities for detection and diagnosis of disease morphology. He was the Secretary of the Swiss Society of Senology, and was also the Secretary of the International Breast Ultrasound School. Professor Otto was one of the founding members of IBUS.
