

In cooperation with

SENOLOGIC INTERNATIONAL SOCIETY
INTERNATIONAL SCHOOL OF SENOLOGY

33rd Anniversary of the IBUS Breast Imaging School

IBUS Masterclass in Multimodality Breast Imaging and Guided Interventions

Date: 13-14 September 2024

The 33rd anniversary of the IBUS Breast Imaging School has stimulated us to take an interdisciplinary-focused look at recent developments in breast imaging and to evaluate the current role of breast ultrasound in comparison to other imaging methods. The influence of artificial intelligence (AI) on the future of senology will be discussed.

This IBUS masterclass covers the basics and advances of multimodality breast imaging, imaging-pathology correlation, staging, treatment, AI and ethics. It also compares the practice and challenges of senology in different regions of the world. The course includes interactive case reading, tumour board discussions and hands-on workshops on interpretation, device handling and biopsy techniques. Join us in Zaventem (Brussels, Belgium) for this comprehensive and practical course celebrating 33 years of IBUS education.

Invited IBUS faculty:

- ✓ *Professor Erkin Aribal MD, Turkey*
- ✓ *Professor Enzo Durante MD, Italy*
- ✓ *Dr Dionysios Koufoudakis MD, Cyprus*
- ✓ *Professor Alexander Mundinger MD, Germany*
- ✓ *Professor Mary Rickard MBBS BSc (Med), Australia*

Program Directors: Professor Enzo Durante - Professor Alexander Mundinger

**An application has been made to EACCME for accreditation
EACCME credits can be converted to AMA PRA Category**

Venue: Zaventem Learning and Education Center (Brussels Airport area)

Address: Da Vincilaan 5, building Caprese, 8th floor, 1935 Zaventem, Brussels, Belgium

Registration: www.ibusmasterclass.com
